

UPGRADE YOUR SPACE:

Smarter Doors,
Timeless Design
the Finishing Touch

WWW.DURABAL.COM 

Step One

Design Consultation

Come to the Showroom, or schedule an online Design Consultation where we can discuss:

- Project stages and timeline
- Working drawings- BAL ratings etc
- Discuss your vision
- Work out functionality needs
- Discuss architectural finishes
- Door and window types
- Materials- Aluminium, Timber, uPVC etc
- Colour and finish options – powder coat, Anodised, Wood Look
- Glazing type – Privacy, Clear, Grey – Single or Double Glazed

Step Two

Receive & Approve Quote

The team will put together a comprehensive and detailed quote. The quote will outline a detailed scope of works, all inclusions and exclusions, along with the next steps, so there will be no surprises that pop up later.

Once quote is approved a deposit will get us started—securing materials and locking in your schedule

Step Three

Receive Shop Drawings

After the deposit, our engineers will send working shop drawings for your review to confirm all design specification, opening direction, and finishes are exactly what you want.

Once you are happy with the shop drawings, sign and email back.

Step Four

Production Begins

Your windows and doors go into full production. All hardware, glass is ordered, delivered and fabricated locally right here in Melbourne.

Once everything is built and we cure the doors you will receive communication to lock in installation dates

Step Five

Installation

Depending on your order your doors and windows could be dropped off at site a day or two before install day.

Our installer will be on site to prep for the install, and arrive at install morning ready to make the magic happen. Some jobs will be completed in the day and some will take multiple days

Done!

Once your doors and windows are installed, and all scopes of work are completed, we will be out of your hair, and you can stand back and admire your vision that has just come to reality.

If you are happy too, we will organise to come out and get some photos of our products once the whole project is completed.
